

## Rimage Products

### Medical Disc System Series

- Perfect for low to medium volume output
- CD, DVD, and Blu-ray Disc recording
- Embedded control centers
- Full color or monochrome printing options
- Available with 1 or 2 recorders

### Producer™ III Series

- Perfect for high volume/industrial output
- CD, DVD, and Blu-ray Disc recording
- Embedded control centers
- Full color or monochrome printing options
- Available with 1 or 2 recorders

## Software Subscription and Support

As the world's largest full-line provider of CD, DVD, and Blu-ray Disc digital publishing systems, Rimage understands the daily challenges of continuous, high-capacity, on-demand disc production. Rimage offers Software Subscription and Support agreements to meet your every need. Software Subscription and Support is a bundled offering; product software upgrades (subscription) and technical support (support). This agreement provides user access to our technical call center and new releases or versions of Rimage software.

## HEALTHCARE IMAGING AND INFORMATION SOLUTIONS

MDS 5100N  
MDS 5300N

# Rimage Burn and Print Systems are at the Heart of Healthcare Solutions

OEMs, ISVs, and VARs, utilize Rimage platforms to provide solutions for all areas of healthcare facilities

Rimage systems are designed to accelerate disc production and produce archival-quality discs more than twice as fast as competitive products. Boasting the highest throughput in the business, the Rimage Medical Disc System handles heavy workloads while simultaneously providing rapid service to patients and/or physicians.

Rimage Medical Disc Systems (MDS), when integrated with medical applications, provide truly automatic operation. Moreover, the MDS provides powerful CD, DVD, and Blu-ray disc™ output capability throughout your facility via a seamless networked connection, making digital output as easy as a shared printer.

In this competitive environment, what healthcare facility wouldn't benefit from producing CDs and DVDs with professional full-color images and patient information printed directly to the surface of the disc? Rimage's state-of-the-art thermal retransfer printing system permanently bonds images and information onto the disc surface. Unlike ink jet printing, this information will not scratch, peel or fade over time. Direct-to-disc printing enables facility logos, patient demographics and physician name, type of imaging exam and date to be printed on the disc. CDs and DVDs with high-quality, direct-to-disc labels market your healthcare services to the community — it's time to get rid of handwritten labels and upgrade your image.

*Third Party Healthcare Solutions are available from a variety of Rimage partners.*
